

December 2016 ver. / edited by Osaka Nature History Center / supervised by Osaka Museum of Natural History

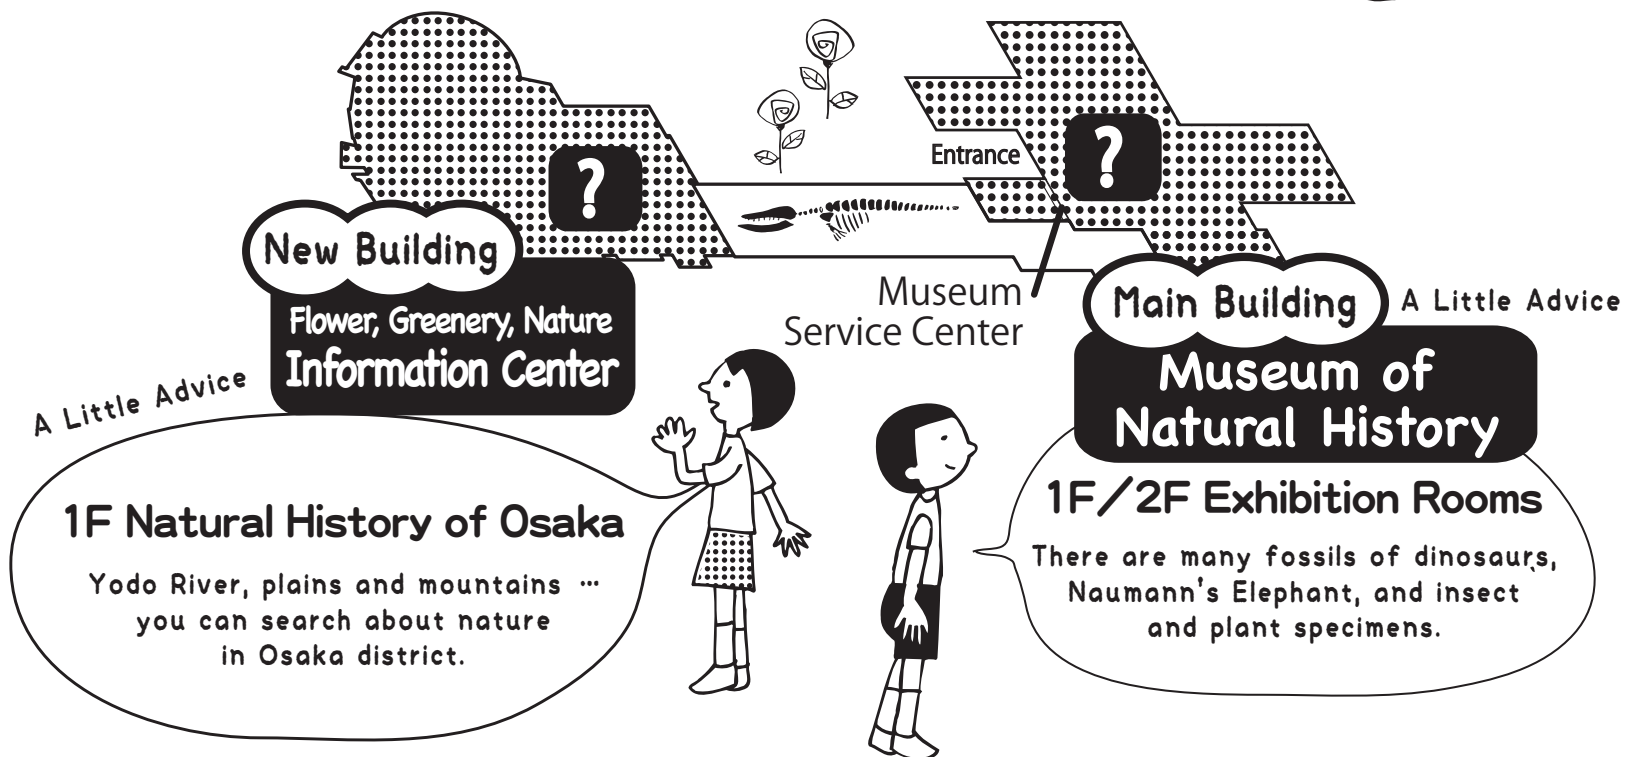

# Osaka Museum of Natural History

# MAP

Welcome to our museum!

There are 5 exhibition rooms filled with specimens.

Also, If you have something you want to search about, please head to the information center!

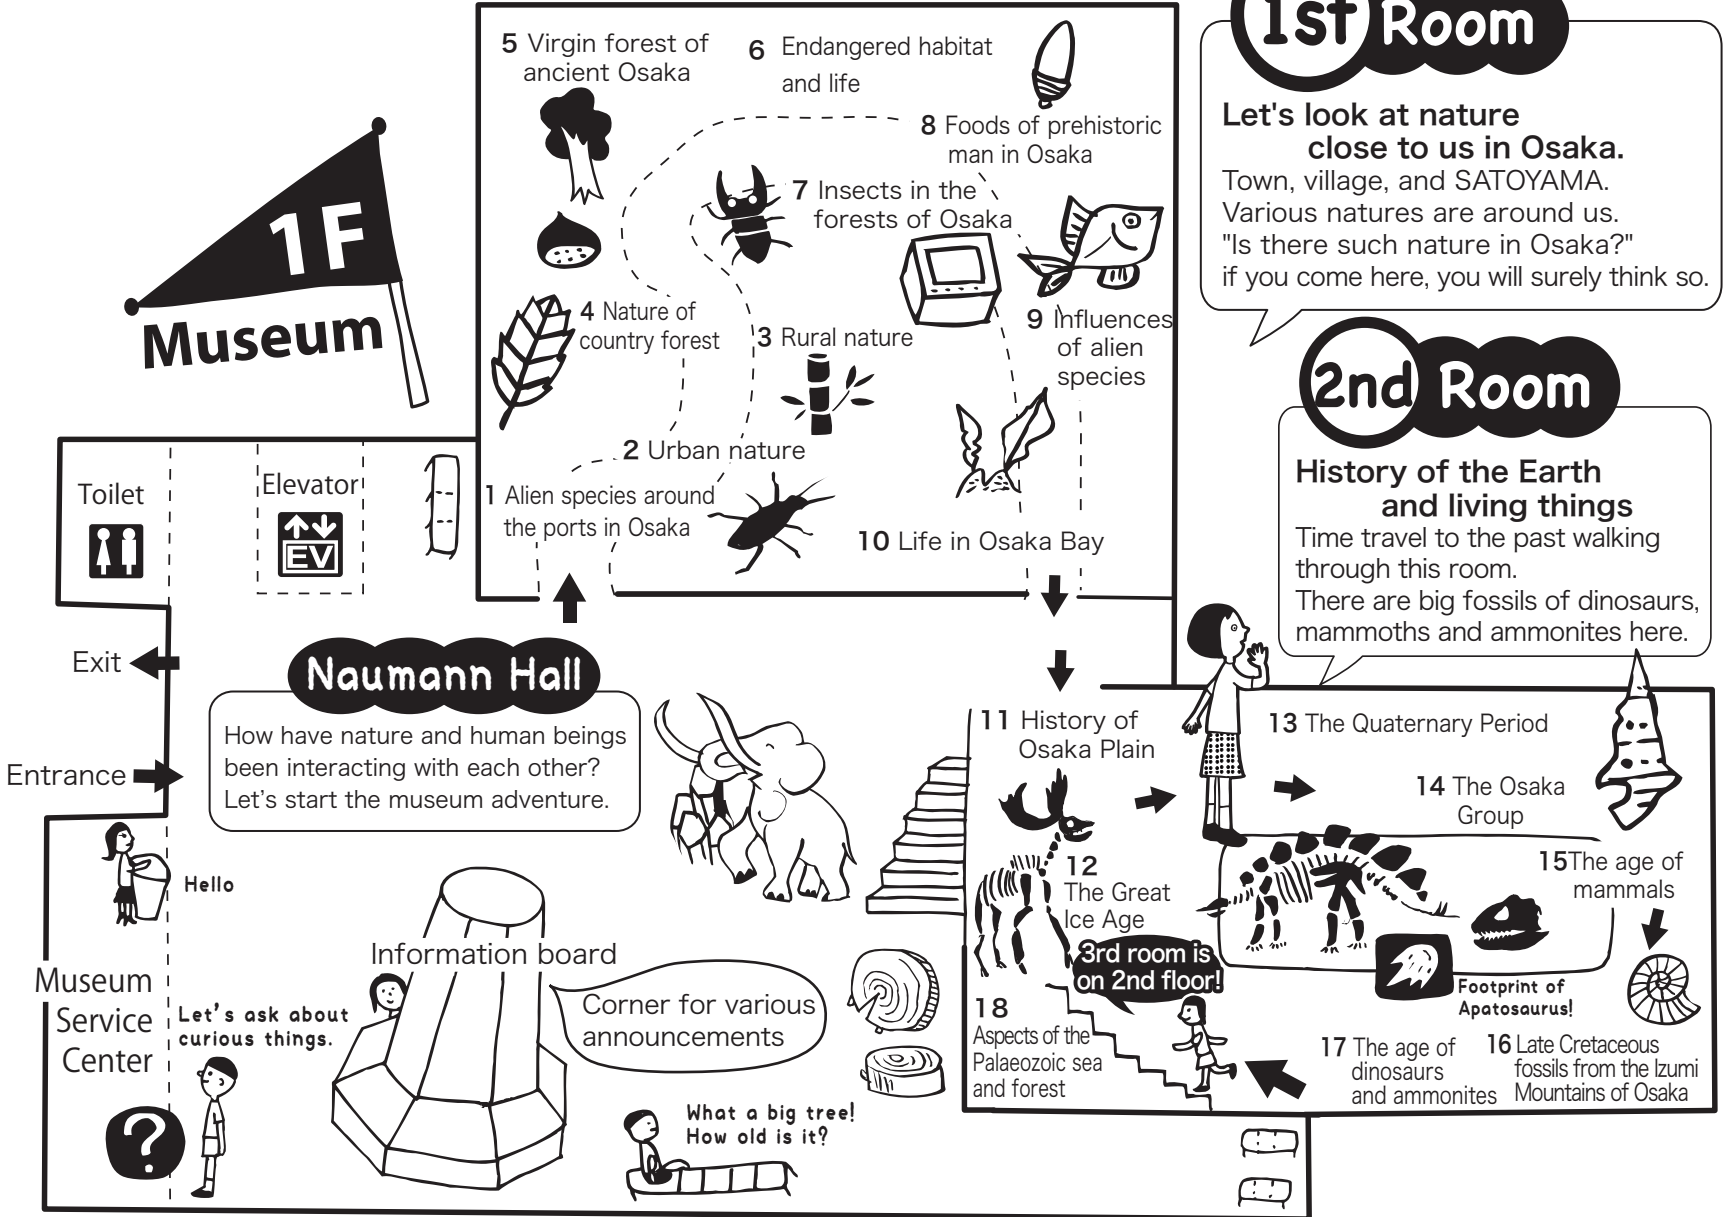

# 1F Museum

## 1st Room

Let's look at nature close to us in Osaka. Town, village, and SATOYAMA. Various natures are around us. "Is there such nature in Osaka?" if you come here, you will surely think so.

## 2nd Room

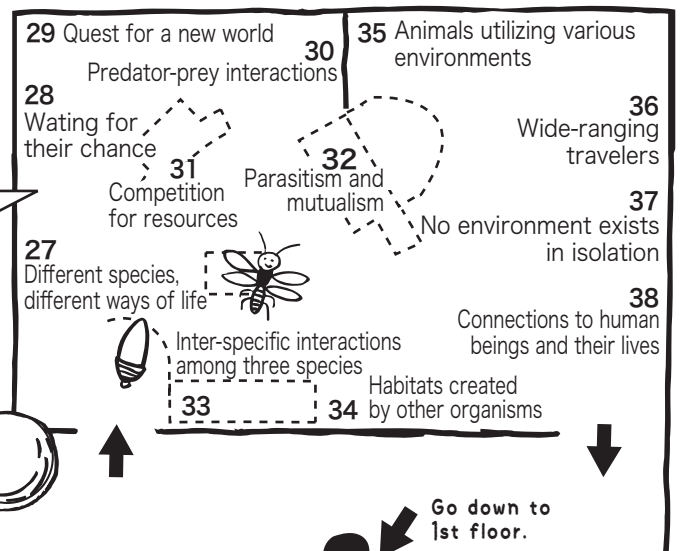

**History of the Earth and living things**  
Time travel to the past walking through this room. There are big fossils of dinosaurs, mammoths and ammonites here.

## 5th Room

### Life of creatures

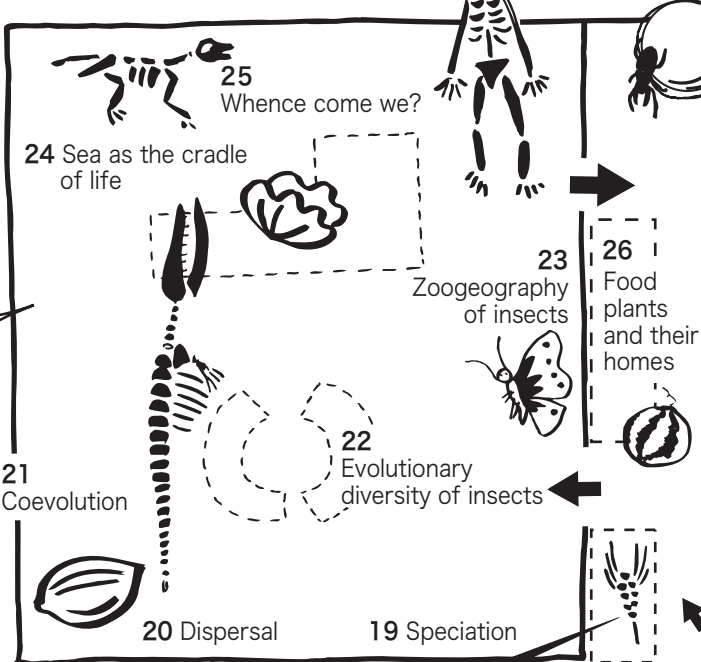

Creatures living in nearby SATOYAMA. We are all connected: humans, insects, birds, and flowers. How do creatures familiar to you live? You will say "Oh, really!" as you are surprised at the ingenuity of living things.

# 2F Museum

## 3rd Room

**Evolution of lives**  
Beautiful butterfly and big crab. Here, you can meet various creatures living on the Earth now. Many animal bones are here, too. How are they different from human bones?

## 4th Room

### Gifts from Nature
